

# WOODWARD GLOBAL SUPPORT SERVICES

## Good maintenance keeps you making money

Woodward's worldwide network of **Authorized Independent Service Facilities (AISFs)** work together to provide repairs and overhauls of your Woodward mechanical products in a timely and economical manner.

### Local Presence for Faster Response

Woodward AISFs are located in almost every geographic area of the world to provide local support and expertise for faster response and turnaround.

### Replacement Units Available to Reduce Downtime

Woodward's AISFs keep an inventory of the more common governors for replacement/exchange of your unit. They also have "core" units that can be converted into the exact configuration needed for your application.

### Factory Authorized Overhauls Assure Like-New Performance

Our technical staff thoroughly understand how your equipment should work and where to look for wear that affects its performance. Woodward AISFs have access to factory information and incorporate the latest engineering updates. All repairs and overhauls use genuine Woodward replacement parts, kits, tools, and procedures to ensure units are returned to "like-new" condition.

### Trust the Experts

Woodward AISFs are under contract with Woodward and subject to periodic quality audits. Their staff meets minimum training and application requirements. They can perform failure analysis and offer on-site service. All AISF services are backed up with a comprehensive warranty.
