**SUBJECT: 723, 723+ and 828 Product Line Statement**

The 723, 723+ and 828 platform is an important product line to Woodward; however, due to lack of obtainable components, Woodward has resolved to cease production of these products in the near future. Woodward has produced and supported this product line for many years and will continue to offer new sales of this product line in the near future and support for them in the long term. Please refer to the below support schedule.

Although the 723, 723+ and 828 product lines have reached end of life, Woodward has a range of electronic controls to meet the needs of our long-standing customers. Woodward product lines such as LECM (Large Engine Control Module) SA (Stand Alone) Main board variant, Flex500, 2300E, and 733 offer the I/O functionality, communication channels and software capability to support the needs of 723, 723+ and 828 applications.

Please contact Woodward or your 723, 723+ and 828 supplier to discuss LECM SA Main board, Flex500, 2300E, or 733 as a replacement for your existing 723, 723+ and 828 applications.

Now - Oct 1st, 2019:

- Unlimited New Sales
- Unlimited Spare Modules
- Unlimited Repairs
- Replacement Exchange with service stock

Oct 1st, 2019 - 2022:

Note – Component obsolescence from electronic manufacturers can present a challenge to post-life support plans. Woodward strives to hold inventory or look for alternative parts when the components we use are no longer available. However, there are times when components simply cannot be obtained and where sufficient last-time buys cannot be made. Unfortunately, in these cases Woodward cannot guarantee the rationalization support plan.

Yours Sincerely,

Sai Venkataramanan
