

15-June-2011

Notification of easYgen-3000/RP-3000 part number transition to new part numbers

We received information from our display suppliers that the monochrome displays for the easYgen-3000 Series are discontinued due to the Tsunami in Japan, which has destroyed the facility of a display component sub supplier.

Based on this fact we are now forced to install color displays in all easYgen-3000 derivatives and RP-3000 Remote panels.

Remote panel strategy:

- Woodward will standardize on only one part number for the RP-3000 which will be equipped with a color display by standard
- Each RP-3000 Remote panel will in future be delivered with a CD-ROM that includes the flash update files to turn it into either a RP-3200-P1, RP-3200-P2 or RP-3500-P1 Remote panel.

o **Advantages:**

- Color display by standard in all easYgen-3000 derivatives and RP-3000 Remote Panels
- Only one part number for the RP-3000
- Distributors and Customers just need to put one RP-3000 Remote Panel on stock and by flashing the corresponding update files it can be turned into a Remote panel that fits to each easYgen-3000 derivate

o **New Software functionality in RP-3000 Remote panels:**

- The Remote panel software will be updated so that the RP-3000 Remote Panel automatically detects whether it has the correct software installed that fits to the connected easYgen-3000 derivate. If the RP-3000 Remote panel and easYgen-3000 software do not match to each other a message on the RP-3000 display will be shown.

Part number changes:

- Woodward will create new part numbers for all easYgen-3000 units, including easYgen-3000/RP-3000 with customized faceplates as well.
- Please see part number transition table in section "Part numbers to be inactivated and corresponding replacement part numbers".

Planned date for transition to the new part numbers:

- The transition to color displays is planned for September-2011.

Part numbers to be inactivated and corresponding replacement part numbers:

The part numbers in this column will become inactive on 31-Dec-2011		Replacement part numbers available in Sept-2011
