SUBJECT: Electric Sonic Valve (ESV) Product Support

This product support statement provides information about the long-term support of the Woodward Electric Sonic Valve (ESV) Gas Valve.

The ESV product line has been discontinued and has entered a support phase. The ESV has been replaced by the LESV (Next Generation Linear Electric Sonic Valve) product line over the past few years and is not available for new applications. LESV uses the same style sonic valve bodies but with a larger actuator to support a wider range of valve sizes. LESV also utilizes the newer DVP driver/positioner. Manual 26419 provides information on the LESV product line.

Customers with ESV valves will be supported with spares and repairs as described below. Alternatively, the LESV may be applied as an upgrade for the ESV. Please contact Woodward for more information about upgrading from ESV to LESV.

Through February 2011:

- Limited spares available for existing applications, based on parts available
- Repairs and Overhauls
- Replacement Exchange with available service stock

Through February 2016:

- Repairs and Overhauls
- Replacement Exchange with available service stock

Affected parts:

The parts affected by this statement include any valves utilizing the 1328-1022, 1328-1023 or 1328-1005 actuators. These assemblies include the following designations:

9904-538	9904-760
9904-553	9904-761
9904-720	9904-762
9904-721	9904-763
9904-722	9904-850
9904-723	9904-951
9904-752	9904-952
9904-758	9904-953
9904-759	

Best Regards,
