

**SUBJECT: Function Line product discontinue notification and last time buy offer**

**OBSOLETE**

**SIMILAR NEW ITEMS**

**EASYGEN**

**EASYGEN-1800**

**EASYGEN-2500**

This announcement is used to inform Woodward Customers, Channel Partners and Sales & Marketing of the product rationalization and product support plan for Function Line controls. The Function Line controls are important to Woodward. However due to acute obsolescence of important components and upcoming RoHS-2 regulation in EU, Woodward is forced to cease production of these devices in the near future. Woodward has produced and supported this product line for many years and will continue to offer new sales of this product line in the short run, and support for them in the medium run. Please refer to the below support schedule.

**Woodward offers the following “Last Time Buy (LTB)” scenario:**

- Orders for the Last Time Buy can be placed until 15<sup>th</sup> May 2019.  
 Woodward will accept orders until this date. We ask our customers to make preparations to apply the items listed in Section *Similar Items* on the next page.

- We will conduct a price increase of 25% on the items listed under *Discontinued Items* effective from 15<sup>th</sup> March 2019
- Woodward will ship items ordered on or before the LTB date until 01<sup>st</sup> July 2019 based upon the LTB volumes. After this date Woodward will stop the production of function line controls.
- Due to year-on-year weak demand production for some items is already suspended. These items can be re-activated based upon LTB demand quantity, RoHS2 exemption and/or a one-off activation fee. These items are marked with a \* in the below table.

**Woodward will commit to the following product line support plan:**

**Now – May 15<sup>th</sup>, 2019:**

- Unlimited New Sales
- Unlimited Repairs
- Unlimited Spares

**May 16<sup>th</sup>, 2019 – May 15<sup>th</sup>, 2020:**

- Limited Service Stock Spare Sales based on available inventory
- Limited repairs based on parts availability

**May 16<sup>th</sup>, 2020 – May 15<sup>th</sup>, 2022:**

- Limited repairs based on parts availability

Further parts obsolescence from electronic manufacturers can present a challenge to post-life support plans. Woodward strives to hold inventory, or look for alternative parts when components are obsolete. However, there are times when components can simply not be obtained and where sufficient last-time buys cannot be made. In these cases, Woodward cannot always guarantee that we can maintain the rationalization support plan.
