SUBJECT: UG-25+ P0/P1 Product Support plan

The UG-25+ product line is a very important product line to Woodward. We have driven continuous product improvement activities since its introduction and these activities resulted in the next generation UG-25+, called the UG-25+ P3. This new P3 version replaces all previous versions, called P0 and P1 versions.

Woodward is announcing a phase-out of production of all P0/P1 version UG-25+ Governors starting April 1st, 2012-, but will continue offering service and repair support for these P0/P1 version UG-25+ Governors until January 1st, 2014.

The UG-25+ P3 is a fully compatible replacement product for P0/P1 versions. Woodward recommends upgrading UG-25+ P0/P1 versions to a P3 version at the next service overhaul. An upgrade program is offered through a selected number of Woodward's Channel Partners. For detailed information concerning the upgrade program, please contact your local Woodward contact or Woodward Channel Partner.

The UG-25+ P3 version uses an improved method for wiring termination. The connection method was changed from a connector to a field terminal connection style. For complete technical details around the UG-25+ P3 please see installation & operations manual B26579

The UG-25+ marine type approval certificates have been renewed and updated for the P3 version models. There is no functional difference between P0/P1 and P3 versions. Below table is a cross reference for the P3 item numbers replacing the P0/P1 item numbers. For each P0/P1 part number there are two possible replacement part numbers of P3, indicating the position of the oil gauge on either the right or left side of the governor.

| UG-25+ P0/P1 | UG-25+ P3 |
|---------------------|--|
| 8528-001 | 8528-114 (Right) 8528-116 (Left) |
| 8528-003 | 8528-118 (Right) 8528-120 (Left) |
| 8528-004 | 8528-104 (Right) 8528-106 (Left) |
| 8528-005 | 8528-100 (Right) 8528-102 (Left) |
| 8528-006 | 8528-115 (Right) 8528-117 (Left) |
| 8528-007 | 8528-101 (Right) 8528-103 (Left) |
| 8528-008 | 8528-119 (Right) 8528-121 (Left) |
| 8528-009 | 8528-105 (Right) 8528-107 (Left) |

For OEM specific replacement part numbers please contact your Woodward account manager.

Note: When applicable, for marine application, the above information can be used to update the technical file. Updating the technical file is the responsibility of the end-user.

Parts obsolescence from electronic manufacturers can present a challenge to these post-life support plans. Woodward strives to hold inventory or look for alternative parts when components become obsolete. However, there are times when components simply cannot be obtained and where sufficient last-time buys cannot be made. In these cases, Woodward cannot always guarantee that we can maintain the product support plan.
